Large Variety of Products

A large variety of agricultural products, which are suited to the natural features of each region, are grown throughout the year in Gifu Prefecture. In the Mino region, rice is cultivated in the warm climate plains, as well as tomatoes, spinach, persimmons, and summer radishes. In the Hida region, vegetables, including summer-autumn tomatoes and summer spinach are produced in the cool climate plateaus. In addition, beef cattle are raised, and dairy farming is conducted in the mountain areas. In the fishing industry, river fisheries and aquaculture are conducted mainly for *ayu* (sweetfish) and trout.
